**BarCode ID Systems Achieves Certified Partner Status for Stay-Linked™
by eBusiness Solution Pros**

.....

ATLANTA, GA -- BarCode ID Systems, a complete systems integrator and mobility solutions provider, has been designated a Certified Partner by eBusiness Solution Pros (eSP), developers of Stay-Linked software—the market leader in host-based, thin-client wireless terminal emulation and Advanced Terminal Session Management (ATSM).

Stay-Linked provides centralized, secure, high-performance wireless access to 5250/3270, VT100/220 and SSHv2 host-based screen applications, with support for a wide range of wireless terminal devices from Symbol, Intermec, AML, PSC, HHP, LXE and other manufacturers.

“Stay-Linked is marketed and sold through an exclusive channel of Stay-Linked Certified Partners, which is comprised of the best and brightest wireless solution integrators in our industry,” said Mike Pagani, eSP’s vice president of sales and marketing. “The solution-oriented selling style of BarCode ID Systems, combined with the level of expertise of its personnel, makes for a perfect addition to our network of quality reseller partners.”

Stay-Linked’s thin-client design offers significant gains in performance, reliability, security, and management when compared to traditional “device-side” Telnet/SSH terminal emulation products. With eSP’s unique Client2Host™ architecture, all terminal emulation and client device/session control runs natively on the same host system as the Telnet/SSH server, with only a thin-client software component on each wireless terminal device. The Stay-Linked server software preserves user sessions when temporary disruptions in wireless access occurs, and automatically returns users the exact point in their original wireless session where they were prior to the disruption.

“We are extremely pleased to receive the Stay-Linked Certified Partner designation from eSP,” said BarCode ID Systems’ COO, Steve George. “The addition of Stay-Linked to our comprehensive solution offering will provide our client base with an extremely powerful advanced terminal session management tool and revolutionary way to manage user sessions. We feel confident that Stay-Linked’s functionality and ease of use will be of remarkable benefit to our clients, and we are proud to be considered a Certified eSP/Stay-Linked Partner.”
